At Vayyar, we understand the obstacles that owners and operators are facing

Labor costs are increasing, staff retention is decreasing, and regulatory scrutiny is on the rise.

Vayyar Care is here to help

with 24/7 automatic fall detection and remote resident monitoring.

vayyar care™

Introducing:

The caregiver that **never sleeps**

We know what a difficult time it is for senior living communities who are going up against:

1. Increasing acuity
2. Staff shortages, turnover, and retention
3. Increased regulatory scrutiny
4. Increased labor costs

Vayyar Care addresses them all.

1. HIGH RESIDENT ACUITY

Increase occupancy

When you're sitting down with the family of a future resident, you can assure them that their loved one is in the best possible hands. Our predictive system ensures not just the best protection but the dignity and privacy that seniors deserve. Imagine having that peace of mind knowing that your loved one is being monitored by a smart system that can get them help faster and more reliably.

2. TOO MUCH WORK AND TOO FEW ASSOCIATES

Lessen your workload

We know that finding new staff members is more difficult than ever before. Fewer associates means less oversight and a higher risk that your residents aren't receiving the attention they need.

The Vayyar Care system's comprehensive coverage can help compensate for a limited staff. Our digital platform and phone app allows your team to reach residents after a fall and help them as soon as possible.

3. COMPLIANCE CONCERNS

Protect your residents and reduce liability

Vayyar Care instantly detects falls without the need for cameras, wearable devices, or buttons. Our data-driven, comprehensive coverage completely transforms how you provide care and safeguards you from a host of internal and high-level challenges.

Risk management litigation can be financially devastating on a senior living community and lead to regulatory fines and higher insurance costs. With a rapid-response Vayyar setup, you can avoid lawsuits and fulfill your care duties.

4. INFLATION AND THE PRICE OF LABOR

Optimize your care

When a resident presses their call button, caregivers have no way to know if they'll be fetching a glass of water or dealing with a major medical emergency. Vayyar integrates with your current call system to prioritize your work – letting your staff know right away when someone experiences a fall so they can take action.

Your seniors deserve better protection. Let us help.
